[REDACTED]
FY-65 Quarterly Report, No. 4

PAR 214

28 May 65

SUBJECT: Roller Transport Processor (12-Inch)

TASK/PROBLEM

1. Design and fabricate a versatile self-threading photographic processor capable of handling both cut sheet and continuous webs of photographic material and adaptable to a process yielding either standard negative or reversal images. Interchange between processes to be accomplished with a minimum of effort.

DISCUSSION

2. Fabrication has been completed and mechanical check out of the equipment is in progress. All testing completed to this date indicates that the processor will meet the design specifications.

3. Sensitometric testing will start during the week ending 12 June 65.

4. It has been agreed that the processor will be shipped to arrive at the customer's facility on Thursday, 5 Aug 65; installation will start on Monday, 9 Aug 65.

PLANNED ACTIVITY

5. The check out program will be completed and shipment will be made on the above schedule.
